### About This Game

WBM Tycoon is a fresh look in sports strategy games that combines the classic manager game with the financial management and development of a Tycoon type game.

As the Club Owner you must generate (or loan) the necessary funds in order to expand the club's facilities, raise the financial level and improve the team's roster.

And as you remain the Manager you are still in charge of the Player's training program and when the match day comes, you have to select the team lineup, create the most appropriate strategy and find the way to victory by countering the opposing manager's plans.

#### Features:

This game is really terrible. The only explanation I could possibly have for buying this is that I was probably drunk, fairly broke and needed a basketball simulation fix that needed attending.

This game would crash every 5 minutes, but that's a good thing. The game is self-aware in that it knows it is not worth playing so it shuts itself off.

. Just horrible. whats the key to save the game? i couldnt find it lol. I don't even know where to begin. This is a waste of \$2.49. I cannot even call this a game. No direction, no clue what it is supposed to be doing. I have played other Tycoon games before but this is just terrible. Do not buy this ( I was a dummy and ignored the other reviewers, don't be like me).

The game starts by asking you to create a game (which in itself is confusing), then it asks you to create a team or take control of an existing team -( instructions are not very clear). Once that is done, you are stuck - no direction as to what to do next, play a game, trade for players, build a facility? I tried several times and finally just gave up and uninstalled the game. Worst purchase I ever made.. simply unplayable. mehhhh... waste of money. Very nice for all manager and tycoon game fans. It has a huge database that includes all the basketball action in the world and is not focused only on NBA, which is a huge plus for me. So you can make a career in Spain, Argentina or even Korea.

At first I was a little put off by the fake names in the database, but after I found the real names patch from <http://www.wbmfan.webs.com/> the problem was solved.

I have been a Football Manager fan for many years and I believe that other sport manager fans will enjoy this game, especially older players that used to play the FM series before the 2D graphic engine was added.. Not such a bad game. Yes, there are bugs, yes, some menus are incorrect or misplaced or the text in them is transparent and you can't read it. And so many missing things, even the most basic ones, like comparing the attributes of one of your players with another player in the world (i haven't figured out how to do that yet!). But, i like the managerial tycoon part of the game (setting ticket prices and expanding the arena) and the CORE of the gameplay, the algorithm of the match, its there, it exists, and its rather good. Still no 2D or 3D representation but only text commentary, but for me its OK, reminds me of the old times playing Football Manager 00V01. Also one good thing is that you can quit the game and save during a match, which is missing from FM for example. Also, the game is rather light with respect to system requirements, the loading and processing times are not so big (even for my low low end laptop). As other reviewers have mentioned, there exist a real names patch and a graphics patch for face picks, so don't be discouraged by the lack of licencing. I would give it a 7V10. Without doubt, a lot of work has to be done by the developers (who are Greek like me) as ti seems like an unfinished product, but the basic framework is set. If you like Basketball AND text sports sims with a flavor of tycoon elements, give it a try and be patient. For all the others, not recommended.. It is not a game you would want at all.

Absolutely terrible, I knew it was gonna be bad but jesus.. didnt like it .

I was hoping for something else. Highly confusing, unsure of what does what. The ingame tool tips are poor. Would be a fun game to run a tycoon of if it was better done.. Horrible graphics, explanation is useless... If you have had a really good month at work, you've had a promotion, bought your wife\girlfriend a new purse, treated yourself to a new coat, pimped out your car with a new soundsystem and still have a few bucks to waste? Then go for it! But I think you might be investing better by just going to an ATM machine, getting the same ammount, and then putting it into a random garbage bin (preferably a blue one tho).. This is without a doubt the worst game I have ever played. Calling it a game is actually disrespectful to other games. It is sort of disrespectful to nouns in general. Please do not get this. A strategic basketball sim is actually a great idea, but I have board games about Feudal Japan that capture the sport better.. By far one of the worst games I've played. You'd think it was the year 2000
